

We make Mobility Management easy

We simply offer the best in Enterprise Mobility Management solutions

Best-in-class Enterprise Mobility Management

We become your complete Mobility Partner supporting platforms from the leading EMM providers, as well as enrollment platforms from Apple, Google, and Samsung

Powered by The Mick George Group

SECURITY

PROTECT YOUR BUSINESS

Security for businesses is more important than ever and Enterprise Mobility Management is the platform that secures devices better than any other.

Enforce PIN/Pass codes and encryption to ensure that your data is kept as secure as possible.

Manage and restrict corporate applications, content and email to ensure that only certain people in your organisation can have access to business applications, files and email and have the ability to pull those apps and files at any point.

MONITORING

MANAGE COSTS

Reduce bill shock by restricting the applications your devices can access and features that may cause high data usage like tethering. Also manage the ability to use data roaming to ensure that high data costs aren't ran up whilst staff are abroad.

Monitoring data usage allows you to see what applications your devices are using your data and triggers can be set to alert you when your data limits are being reached or breached.

INCREASED PRODUCTIVITY

ALL THE TOOLS YOU NEED

Provide your employees with business-critical applications and content wherever they are in the world and whatever device they use.

Enterprise Mobility Management can link up with your Android and Apple management accounts like Volume Purchase program and Managed Google Play to allow bulk purchase and distribution of applications without the need for your users to have an Apple or Android account.

EASY ENROLLMENT

DEP KME ZT.

As your Mobility partner, we also support your enrollment platforms from Apple, Google and Samsung. As a key partner to Apple we support the enrollment of devices and policies into the Apple Business Manager and application distribution via the Volume Purchase Program.

Connect 365 are also a key partner of Samsung Knox and Google Zero Touch giving peace of mind that your Android devices are always managed and auto-enrolled into your enrollment platform of choice.

FULFILMENT

EVERYTHING YOU NEED

We fully set up all of your devices, including enrollment to your EMM portal, installing business applications, attaching accessories, PIN codes, SIM cards and anything else needed for deployment to run smoothly.

SUPPORT

HERE WHEN YOU NEED US

We are available 24/7 to completely manage the day-to-day running of your EMM solution giving you ultimate peace of mind, enabling you to run your business more efficiently.
